4. Each year the Broward County Commission currently selects one of its members to serve as the county mayor. The mayor typically rotates every year between the nine (9) county commissioners who are each elected by voters in different geographic districts. No one on the county commission runs for office county-wide or is elected to represent the entire county.

The idea of having a mayor who is elected countywide, serving a 4-year term, has been discussed by community leaders and by the county commissioners. Do you favor the current system of having the Mayor of Broward County selected each year on a rotating basis by the county commissioners from within their ranks or would having the mayor be elected, to a 4 year term, by the voters of Broward to represent the entire county be better?

*364 completed surveys calling landlines and cell phones between 10-30-2019 and 11-3-2019 (inclusive).
The Margin of Error for this poll with 95% confidence is +/- 4.95%.*

1. Keep the current system of the county commission selecting the Mayor every year from the within their ranks – 36.71%
2. The Mayor should be elected by the voters countywide – 63.29%

5. The county commission recently approved a workshop to discuss letting the voters decide whether they want to keep the current system of having the county commission select one of their own to serve as mayor every year or have a mayor elected by the voters countywide every 4 years. Do you think the county commission should let the voters decide whether or not there should be a countywide elected mayor, or do you think they should just keep the current system without letting voters have a say?
